CAREER OBJECTIVE

Software Engineer with experience building production web and mobile applications across the full stack using React, Next.js, Node.js, and TypeScript. My objective is to work on scalable, AI-driven products where I can contribute to architecture, APIs, and user-facing features while delivering reliable, maintainable software.

TECHNICAL SKILLS

- **Technical Languages:** JavaScript (ES6+), TypeScript, Java, Python, SQL
- **Frontend:** React.js, Next.js, Angular, Tailwind CSS, Shadcn UI, Responsive Design, Component Architecture
- **Mobile:** React Native, iOS
- **State & APIs:** REST APIs, WebSocket, Webhooks, React Context, React Query
- **Backend:** Node.js, Express.js, MongoDB, Django, Flask, Laravel
- **Tools:** Git, Postman, Cursor, Claude Code, MCP, Docker, Supabase

EXPERIENCE

- **Full Stack Software Engineer | Shastack | 2025 – Present**
 - Build and maintain React, Next.js, and TypeScript web applications for client projects and internal Shastack products, integrating RESTful APIs with backend services.
 - Develop reusable UI components and frontend modules used across assessment platforms and internal tooling.
 - Deliver responsive, production-grade interfaces for enterprise clients including Amazon, Capgemini, and Dell Technologies.
 - Own API integration, implementation, code review, and deployment across the software development lifecycle.
 - Improve code quality through code reviews, performance optimization, and AI-assisted development workflows (Cursor, Claude Code, MCP).

PERSONAL PROJECTS

- **SwiggyLens | 2026 | [Link](#)**
 - Built an AI agent with Next.js and TypeScript that connects to Swiggy across Food, Dineout, and Instamart via MCP tools to surface cross-vertical food behavior insights.
 - Implemented food mode detection, proactive insight cards, spend dashboards, and natural language chat over live order data using an AI agent loop.
- **RepoFAQ | 2025 | [Link](#)**
 - Built a no sign-up web app where users paste a GitHub URL and get FAQs with answers traced to actual files in the repo.
 - Designed a clean frontend for repo ingestion, Q&A display, and file-level source citations.
- **CodeIt | 2024 | [Link](#)**
 - Developed a real-time collaborative coding platform using Node.js, Socket.io, and Express, enabling multiple users to code together in a shared environment. Real-time synchronization of code using WebSocket communication protocols.
 - Implemented a room-based coding system where users can join via unique Room IDs, facilitating seamless collaboration.
- **Zomato UI Clone | 2024 | [Link](#)**
 - Built a pixel-level Zomato UI clone with React and styled-components, covering restaurant listings, menus, and the full ordering flow.

EDUCATION

- **Undergraduate Program** MGM-Jawaharlal Nehru Engineering College (2021-2025)
CGPA-8.0
 - **Junior College** Vidyadham Science Junior College (2019-2021)
93% (PCM)
 - **Schooling** Podar International (CBSE) School
88%
-
